Class Projects

Brella-Real time weather website

This is a short weather website where you can search and get the weather details of any city. It uses api key to fetch the weather data.

[View Project](#)

Periodic Table using C

This is a portable and handy periodic table specially designed for students learning chemistry. It helps the user to learn about the various properties of elements with easy searching by their name, symbol, or atomic number.

Interactive stock price visualization tool

This project introduces an interactive and dynamic Python-based tool for visualizing stock prices using Plotly and the Yahoo Finance API. The user interface allows users to select from a range of popular stocks, such as Google, Tesla, Apple, Cisco, and Intel, or input a custom stock name for personalized analysis.
